PROFESSIONAL EXPERIENCE

Student Consultant – IPA, International Project in Action
Medidedalia (AI healthcare startup), Barcelona, Oct 2025 – present
- Supporting an early-stage AI startup developing secure generative AI and automation tools for hospitals.
- Conducting market maturity and adoption analysis to identify high-potential European healthcare systems.
- Designed a two-tier SaaS pricing strategy (Basic €450/month, Premium €550/month) benchmarked against the leading market competitor, defining features, setup fees and scalability logic for hospital clients.
- Mapping potential clients and building a targeted outreach approach to accelerate product-market fit.

In-Company Consulting Project Participant
Be. Shaping the Future S.p.A, Milan office, Mar 2025 - Apr 2025
- Designed and presented to senior managers an AI-powered ESG risk assessment tool for financial institutions, integrating NLP-based sentiment analysis (VADER/BERT) and machine learning models (XGBoost, ARIMA) to generate dynamic social risk ratings (1–5 scale) for steel sector companies.
- Defined the tool's data architecture by mapping and structuring sources across ESG reports, news outlets, and social media, and developed the scoring methodology including a weighted rating system with a sentiment-based multiplier.
- Researched CSRD, SFDR, and EU Taxonomy regulatory frameworks to ensure the tool's output aligned with institutional compliance requirements for ESG investing.
